Course: Basic General Chemistry (CHEM F103X); 4 credits

Prerequisites: Placement in ENGL F111X or higher AND placement in DEV F105 or higher. Students who do not satisfy these requirements MAY be admitted with permission of instructor.

Locations and meeting times:

Lecture: REIC 201; TR 9:45 am – 11:15 am
Lab: REIC 242
   F01 (74734): M 2:15 pm – 5:15 pm
   F04 (74735): M 6:00 pm – 9:00 pm
   F02 (74736): T 11:30 am – 2:30 pm
   F03 (74737): T 2:45 pm – 5:45 pm
   F05 (74738): T 6:00 pm – 9:00 pm

Blackboard link: [http://classes.uaf.edu](http://classes.uaf.edu)

All course information, supporting documents and exam scores for this course will be maintained on the UAF Blackboard website. It is therefore important that you check the site regularly for updates. Moreover, time-sensitive information and reminders will occasionally be sent by email to all students enrolled in the course, so it is important that you verify that your email address (listed on the Blackboard website) is correct.

Instructor: Dr. Brian Edmonds

Office hours: MWF 10:15 am – 12:00 pm (or by appointment)

Office: Department of Chemistry and Biochemistry

Researchers Building (REIC), Room 180

Research Lab: AHRB, Room 290

Phone: (907) 474-6527

E-mail: bwedmonds@alaska.edu

Preferred contact: e-mail

Required course material:

Text:

Title: *General, Organic, and Biological Chemistry, Sixth Edition* (2010)
Author: Stoker, H. Stephen
Publisher: Brooks/Cole, Cengage Learning

The text and OWL access bundle can be purchased at: www.cengagebrain.com/micro/uaachem

Online Web-Based Learning (OWL) Account:

Go to [http://www.cengage.com/owl/video/gettingstarted/](http://www.cengage.com/owl/video/gettingstarted/) and watch the video for instructions on how to obtain an access code, register, and log on to the OWL site for this course. If you have any problems, contact the instructor (Edmonds) or OWL technical staff at [http://www.cengage.com/chemistry/owlsupport](http://www.cengage.com/chemistry/owlsupport).

Scientific calculator:

You must have a calculator capable of scientific notation.

Laboratory Manual:

The labs will be made available on Blackboard.
Course Description:
This course covers the fundamentals of general chemistry including historical and descriptive aspects. Students also receive instruction on the application of basic mathematical methods to solve problems in chemistry. This course fulfills the laboratory component of the natural science requirement, and prepares the student for CHEM F105X. Note: CHEM F103X satisfies elective credit only.

Specific Coverage:
I. Basic properties of matter
II. Structure of the atom
III. Chemical bonding and chemical reactions
IV. Physical states (phases) of matter
V. Properties of solutions
VI. Reaction rates and chemical equilibrium
VII. Fundamentals of acid-base chemistry

Course Goals:
Students who successfully complete this course will have an understanding of the fundamentals of general chemistry. Specifically, students will have an understanding of atomic structure, and how the properties of atoms govern the types of chemical bonds that join atoms together in particular arrangements to form compounds. Students will also acquire a detailed understanding of the fundamentals of chemical reactions, including concepts such as chemical equilibrium and chemical reaction rates. The emphasis on problem solving in this course will provide excellent preparation for subsequent training in chemistry.

Learning Outcomes:

1. What is the difference between matter and energy?
2. What are the fundamental particles of an atom and how are those particles arranged?
3. What feature of the atom gives it its identity?
4. How does the electronic structure of an atom govern how it reacts with other atoms?
5. What are the fundamental types of chemical bonds, and how are they formed?
6. How are ionic and covalent compounds named?
7. What is a “chemical reaction”? How does one balance a reaction? What is the definition of a “mole”, and how does the mole concept facilitate the determination of mass-mass relationships?
8. What are states (phases) of matter, and how do intermolecular forces affect the phase at a given temperature?
9. What is the ideal gas law, and how is it used to determine specific properties of gases?
10. What is a solvent, and what general feature of the solvent determines the types of solutes that it will dissolve?
11. What is the “activation energy” for a reaction, and how does this energy influence the rate of a reaction?
12. What is the definition of “chemical equilibrium”?
13. What is the definition of an acid (a base)?
14. What is pH? What is a buffer? How does a buffer affect the changes in pH that occur in response to addition of acid or base to a solution?

Instructional Methods:

A traditional lecture-based format will be used for the classroom component of the course. Lectures will occasionally be augmented with PowerPoint presentations.
Core Assessment:
Chemistry 103 is part of the UAF Core Curriculum. “The overall goal of the Natural Sciences component of the Core Curriculum is to prepare students for lifelong learning in the natural sciences…” [Faculty Senate Guidelines, 1990]. To partially fulfill this objective, students will, in addition to the specific course coverage outlined above, receive specific instruction on the scientific method, the set of practices that scientists must follow to obtain a meaningful interpretation of their results. In addition, students will be given examples of the interplay between scientific knowledge and public policy throughout the course. The purpose of these examples is to encourage students to think about and comment on the impact of scientific knowledge on public policy. For example, how does the scientific literature concerning health effects of fluoridated water affect decisions to alter the fluoride content of municipal water.

Course Policies:

Attendance: Students are expected to attend class and actively participate.

Cell phones/Computers: The use of cell phones during class is not permitted. Notebook computers may be used for taking notes. Any other use is prohibited.

Preparation: Students are expected to read the assigned sections of the textbook (see course calendar, below) prior to class.

Exams: Four exams will be given (three midterms and a final). Makeup exams will be allowed only with pre-approval of the instructor or an acceptable reason. Acceptable reasons for makeup exams include severe illness, family emergencies, or other unavoidable events including dangerous weather conditions and serious car accidents. The exam format for makeup exams may be different from the original exam. Exams dates and times are posted on the course calendar.

OWL Homework: Homework assignments must be completed by the posted due date in order to receive credit. Your homework grade will be calculated from the top 90% of total points available for homework assignments.

Lab: A detailed outline of policies pertaining specifically to the lab portion of the course can be found on Blackboard. Students must complete at least 8 of the 11 offered labs to pass the course; however, know that your overall lab grade will be calculated from the highest 10 lab scores (the lowest score will be dropped). Questions concerning the lab should be addressed to your lab TA, or to the laboratory coordinator, Emily Reiter (REIC, 194A; 474-6748; e.reiter@alaska.edu).

Grading:
Exam and lab scores will be posted on Blackboard. Sapling homework scores are available on the Sapling website.

Final grades will be calculated as follows:
- Midterms I - III 300 pts (100 points for each exam)
- Final Exam: 100 pts (not cumulative)
- OWL homework: 125 pts
- Lab write-ups/exercises: 125 pts

Letter grades will be assigned as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>585 – 650</td>
</tr>
<tr>
<td>B</td>
<td>520 – 584</td>
</tr>
<tr>
<td>C</td>
<td>455 – 519</td>
</tr>
<tr>
<td>D</td>
<td>390 – 454</td>
</tr>
<tr>
<td>E</td>
<td>Less than 390</td>
</tr>
<tr>
<td>I</td>
<td>Failure to complete course requirements</td>
</tr>
</tbody>
</table>

Support Services:
Support can be obtained through the University of Alaska Library system, online resources, and the instructor. Additional services are available through Student Support Services (http://www.uaf.edu/sssp/) at UAF.
Disabilities Services:
We will work with the Office of Disabilities Services (http://www.uaf.edu/disability/) to provide accommodations for students with disabilities. If you have a disability and require special assistance, please contact the instructor as soon as possible. Students with disabilities must provide a written statement indicating any special requirements that will be necessary as early in the semester as possible (preferably within the first week).

Cheating/Academic Dishonesty:
The Chemistry & Biochemistry Department Policy on Cheating is: “Any student caught cheating will be assigned a course grade of F. The student’s academic advisor will be notified of this failing grade and the student will not be allowed to drop the course.” The Department considers performing unauthorized “dry labs” as cheating. Partnering during the lab is acceptable, but lab reports must show your own calculations and ideas.

Amending this Syllabus:
The instructor may initiate changes to this syllabus subject to unanimous approval by the students. Any changes will be clearly communicated via email and posted on Blackboard.

The instructor reserves the right to make minor changes to the lecture schedule (attached), and also to make changes to the grading policy that are of benefit to ALL students enrolled in the course. Neither of these two types of changes is subject to student vote/approval.

Important Dates:
- Late registration deadline (last day to add classes) Friday, Sept. 7
- Last day for 100% refund of tuition and fees Friday, Sept. 14
- Last day for faculty- and student-initiated drops Friday, Sept. 14
- (course does not appear on academic record)
- Freshman progress reports due Friday, Oct. 5
- Last day to apply for fall 2011 graduation Monday, Oct. 15
- Last day for faculty- and student-initiated withdrawals Friday, Oct. 26
- (W appears on transcript)
- Thanksgiving Holiday Thursday, Nov. 22 – Sunday, Nov. 25
- Last day of instruction Monday, Dec. 10
- Finals Wednesday, Dec. 12 – Saturday, Dec. 15
## Chem 103 Lecture/Lab Schedule
### UAF Fall 2012
